

UZI

LAW ENFORCEMENT

Now in .45 ACP

The legendary UZI SMG is now available in .45 ACP

How do you improve the most widely acclaimed law enforcement submachine gun in modern history? Easy; make it in .45 ACP. That's exactly what we've done. All the stopping power of this proven round is built into the compact frame of the standard UZI. This new UZI is identical in size to the original 9mm model and takes all of the same accessories, yet provides major caliber firepower for those law enforcement agencies and qualified security personnel who want it.

The original Parkerized 9mm UZI is back.

The UZI that earned a worldwide reputation for quality and dependability in all kinds of adverse conditions was Parkerized. Now, that same model is again available. The renowned UZI balance, low recoil and full-auto control are all there in a rugged, rust fighting finish. When sustained accuracy and firepower are required in harsh environments, rely on the tough Parkerized UZI.

The Standard UZI: still the free world's favorite.

No matter what the need, the standard, Low Profile Black UZI SMG is the first choice of law enforcement and security agencies who require unfailing reliability and instant controlled firepower. Of course, the world famous UZI, manufactured by Israel Military Industries, is backed by complete service facilities which offer genuine IMI spare parts. Equally important, a complete selection of top quality, practical accessories is available to further enhance effectiveness and aid concealment.

There's even a .22 cal. conversion kit available.

Now, training and practice can be expanded inexpensively with the new UZI .22 LR conversion kit. When

installed, this kit loads, functions and fires just like the standard 9mm configuration. As such, it can reduce training cost and allow practice in range areas which can't handle 9mm ammo.

Whether you select 9mm or the new .45 ACP, in Low Profile Black or Parkerized finish, rely on the worlds most respected submachine gun – The UZI

RATE OF FIRE:	600 rounds/min.	500 rounds/min.

UZI

MANUFACTURED BY

ISRAEL MILITARY INDUSTRIES

All the quality, reliability and firepower of the UZI in a more concealable package – The MINI UZI.

At just over 14 inches in length, the MINI UZI answers the need for performance in a smaller size. All of the well-known UZI features like balance and controllability are built into this compact 9mm submachine gun for easier concealment and vehicle transport.

Now choose from 3 models – open bolt, closed bolt or heavy bolt – to meet specific requirements.

While both the open bolt and closed bolt models have the same rate of fire, the new closed bolt model provides improved accuracy on the first shot and during semi-auto firing. The heavy bolt model offers a reduced rate of fire for situations requiring easier control.

All three models are designed and manufactured by Israel Military Industries to meet the most stringent quality and performance requirements. Once again, a wide variety of UZI performance and concealment accessories are available.

The smallest UZI ever offered still packs 9mm power – The New MICRO UZI.

When the situation requires maximum concealment with no sacrifice in 9mm firepower, there's only one choice – The MICRO UZI. Less than 10 inches long with the shoulder stock folded, this brand new submachine gun packs UZI quality and balance into the smallest model ever.

micro UZI

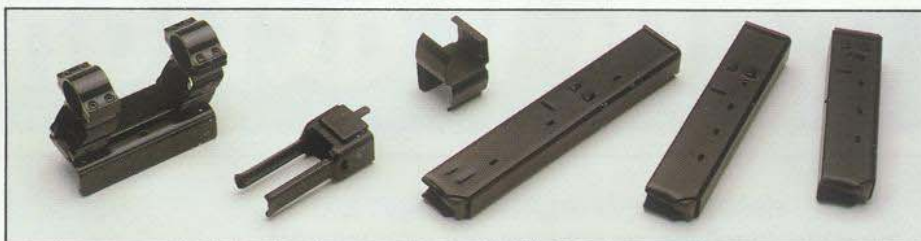

accessories

Like the standard UZI and the MINI UZI, the MICRO UZI is also designed and manufactured by Israel Military Industries. Every model IMI produces is built to the highest standards and undergoes the industry's most rigorous inspection and testing procedures. This assures each law enforcement and qualified security agency the legendary UZI quality, reliability and performance in any model they select.

A complete assortment of cases for every law enforcement requirement is available. Shown above, left to right: ACU 2009107 hard case, ACU 2009123 undercover softcase, ACU 2009106 SWAT case, and ACU 2009108 SWAT case.

UZI accessories are all designed and manufactured for perfect functioning in the UZI line of law enforcement products. Shown above: ACU 2009116 scope mount, ACU 1931200 magazine loading tool, ACU 1950910 magazine clip, and ACU 1720000, ACU 1710000, and ACU 1750000 magazines.

action ammo

The only +P ammo made in 9mm and .45 ACP – UZI Ammo

Only the company who makes the UZI could bring you ammo specially designed for submachine gun use. The new UZI line of ammo has both a +P 9mm and a +P .45 ACP round available.

Samson Ammo fills out your pistol and rifle ammo needs including the only 63 grain .223 commercially available.

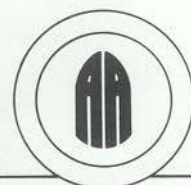

From .380 to .45 ACP, plus .223, .308 and .30/06, Samson and UZI Ammo are manufactured by Israel Military Industries to the same quality standards as the ammo supplied to the Israel Defense Forces. No ammunition is more dependable.

mark V action sight

The first electronic sight that's small, light and rugged enough for law enforcement requirements.

Parallax-free, single plane red dot aiming is now available in just 5 1/8 inches of lightweight, rugged 1 inch aluminum tubing. The Mark V Action Sight offers fast, low light acquisition with an adjustable intensity LED aiming point and an average battery life of up to 500 hours.

Waterproof and nitrogen filled, this sight has withstood thousands of test rounds and is backed with a 5 year warranty. It fits most standard 1 inch rings and has conventional windage and elevation adjustments. The Mark V Action Sight brings reliable advanced electronic sighting to the law enforcement field.
