.41 ACTION EXPRESS CONVERSION KITS FROM ACTION ARMS LTD.

.41AE kits are available for the 9mm or .38 Super Colt Commander or Government/Gold Cup models and 9mm Browning Hi-Power commercial pistols (P35). While all of these were originally designed to be "drop-in" kits, some may require minor gunsmithing or fitting.

The Colt kits consist of two magazines and a .41AE barrel (in either 4150 or stainless steel) complete with link, pin and bushing in 4 $\frac{1}{4}$ ", 5" or 6" lengths. Brands other than genuine Colt pistols may have to be custom-fitted.

The Browning kits consist of two magazines, a stainless steel barrel and a 20-lb. recoil spring. It is suggested that the ejector be shortened by approximately 1/8". This will facilitate ejection of .41AE cases while not affecting the pistol's performance in the 9mm mode.

In addition, .41AE kits are available for the UZI Semi-Automatic Sporting Carbine and Submachine Gun. The 9mm to .41AE kits consist of a magazine and barrel while the .45ACP to .41AE kit comes with a magazine, barrel and bolt.

See reverse for listing of kits and accessories.

WARNING

No liability is expressed or implied for damage, failure, or injury which may result from improper installation or any alterations performed on any part, nor from the use of hand-loaded or re-manufactured ammunition. No liability is expressed or implied, nor is any guarantee as expressed, valid, when the kits or parts are assembled, fitted, or altered in any way by a gunsmith, pistolsmith, or individual in the process of building, assembling, or accurizing custom-made pistols.
