**action
arms ltd.**

The AT-84 is available in 9mm and the new .41 Action Express.

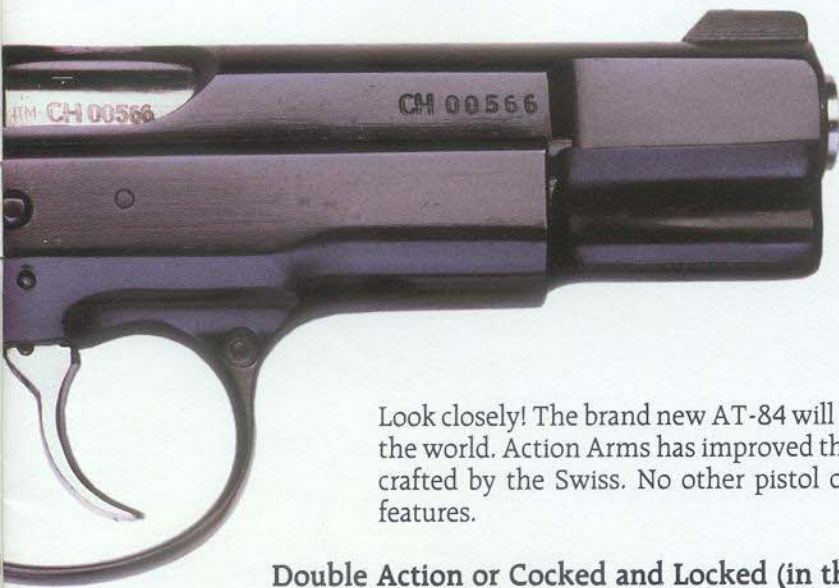

Actual Size

All the features of the AT-84 in your choice of two sizes.

If you want a full sized 9mm auto, select the AT-84. If you want a more concealable model, choose the AT-84P. Both models give you a choice of double action or "cocked and locked" carry; both feature fine Swiss craftsmanship and both are backed by the proven warranty and service experts at Action Arms Ltd.

NEW AT-84 PISTOLS

The Action Arms AT-84 combines Swiss quality and a legendary design in today's most advanced handgun.

Look closely! The brand new AT-84 will look familiar to handgunners who know the great pistols of the world. Action Arms has improved this legendary design in the best possible way. They've had it crafted by the Swiss. No other pistol offers the AT-84's combination of quality and innovative features.

Double Action or Cocked and Locked (in the same pistol).

The superior design of the AT-84 provides a choice of double action or "condition one" (cocked and locked) carry in the same pistol. The AT-84 is a double action service pistol that can compete in target events without extensive modification.

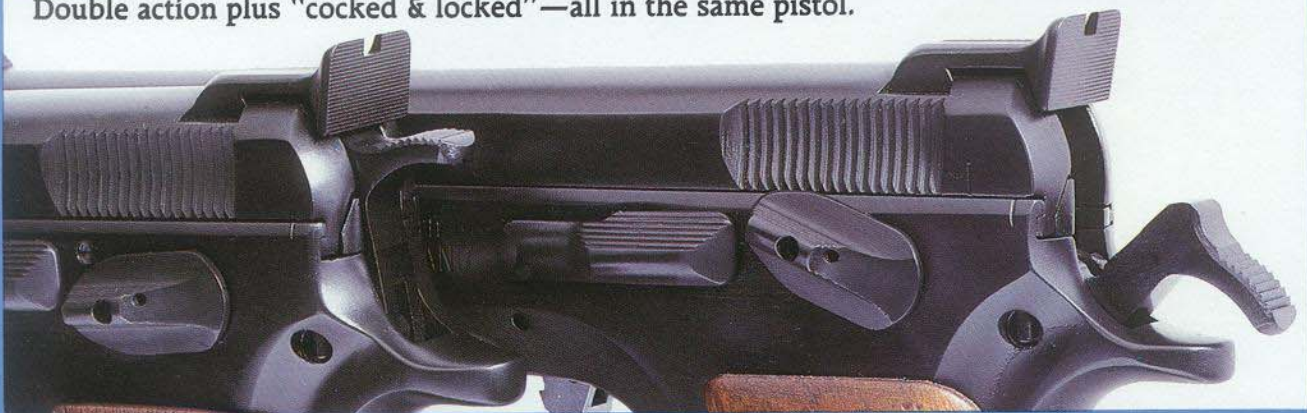

9mm—today's choice for performance, efficiency, and magazine capacity.

Police forces, elite security agencies, and even our military have selected the 9mm for their handgun needs. The AT-84 uses this efficient cartridge and provides a 16 round capacity. And the more concealable AT-84P packs a full 14 rounds into its very compact size.

Swiss quality at a surprisingly affordable price.

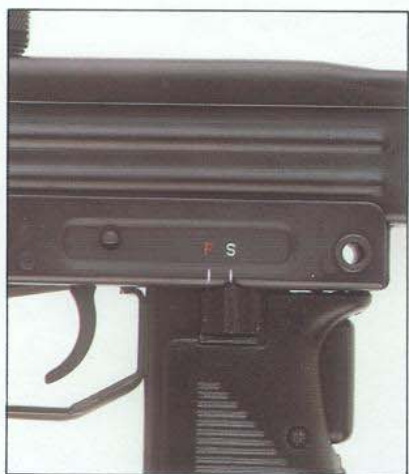

Compare the AT-84 with any other autoloader. Look at the finish. Work the slide, safety and trigger. Then compare price. You'll find that you can buy the AT-84 for less than many models having outdated designs and inferior workmanship.

Double action plus "cocked & locked"—all in the same pistol.

1. The UZI Mini Carbine features a convenient grip safety as well as standard safety selector lever.
2. Caliber selection includes 9mm and .45 ACP.

NEW UZI MINI CARBINE

**Now, all the
performance,
reliability and rugged
good looks of the UZI
in a more compact size.**

One look shows that the new MINI Carbine is all UZI. While it's scaled down in size, it still has full-scale UZI performance, quality and dependability.

Select either 9mm or .45 ACP.

Like the full-sized UZI Carbine, the new MINI Carbine is offered in two of today's most popular auto pistol rounds: 9mm and .45 ACP. Select either of these cartridges and the MINI Carbine provides a major step up in velocity, energy and accuracy over the performance offered by a handgun.

MANUFACTURED BY

ISRAEL MILITARY INDUSTRIES

The legendary UZI is available in 9mm, .45 ACP, .41 Action Express and—with conversion kit—.22LR.

MANUFACTURED BY

ISRAEL MILITARY INDUSTRIES

UZI CARBINE

America's most respected carbine ...

Also available in popular .45 ACP and new .41 Action Express.

How do you improve the UZI—the most widely acclaimed carbine in modern history? Easy; build it in .45 ACP. That's exactly what we've done. All the power of this proven round is built into the compact frame of the standard UZI. This new UZI is identical in size to the original 9mm model and takes all of the same accessories, yet provides major caliber advantages many shooters want.

The Standard 9mm UZI: still America's favorite.

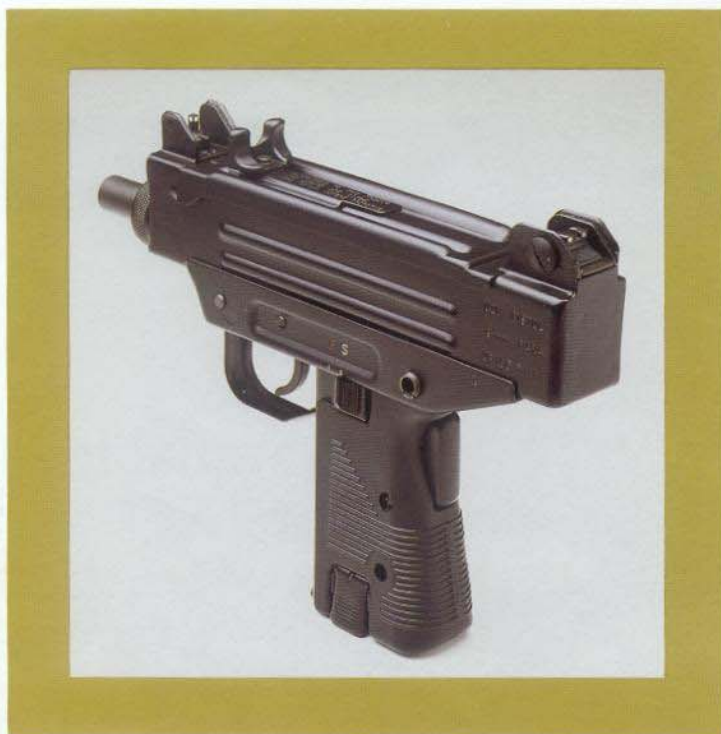

No matter what the need, the standard UZI Carbine is the first choice of shooters who require unflinching reliability and superior accuracy. Of course, the world famous UZI, manufactured by Israel Military Industries, is backed by complete service facilities which offer genuine IMI spare parts. Equally important, a wide selection of top quality, functional accessories are available to complement the UZI Carbine.

There's even a .22 cal. conversion kit available.

Now, practice inexpensively with the new UZI .22 LR conversion kit. When installed, this kit loads, functions and fires just like the standard 9mm or 45 ACP configuration. As such, it can allow shooting in range areas which can't handle 9mm or 45 ACP ammo.

A traditional wood stock is offered as an accessory to replace the standard metal folding stock.

Convenient features such as grip safety, along with fully adjustable front and rear sights, make the UZI Pistol safe and accurate.

UZI proven quality and dependability in a pistol sized package.

Less than 10 inches long, this pistol packs well known UZI balance and performance into the smallest model ever, while retaining all the reliability of the proven UZI system. In fact, 25- and 32-round carbine magazines can be used to give the UZI Pistol the largest capacity of any pistol available.

Now, select either 9mm or .45 ACP.

The UZI Pistol was first offered in 9mm, but now it handles .45 ACP every bit as well. The unique UZI bolt design reduces recoil and lets the shooter get maximum accuracy from the click-adjustable pistol sights provided. Whether

shooting UZI Brand high velocity 9mm or .45 ammo, the UZI Pistol offers unmatched magazine capacity and recoil control in these two popular pistol rounds.

Compact, well-packed and all UZI.

The UZI Pistol comes packed in a rugged carrying case with a 20-round magazine and a sight adjustment key. Like the standard UZI Carbine, it is manufactured by Israel Military Industries. Every model IMI produces is built to the highest standards and undergoes the industry's most rigorous inspection and testing procedures. This ensures legendary UZI quality, reliability and performance in any model selected.

Just under 10 inches long, this is the smallest UZI available.

UZI PISTOL

The UZI Pistol comes in a practical molded case for convenient storage and transport.

.308 Model AR

.223 Model AR

.223 and .308 rifles good enough to join the UZI.

Now the quality and reliability that made the UZI a legend are available to the rifle shooter. Taking advantage of advanced firearms design and technology, the GALIL can be field stripped, cleaned and reassembled in seconds. This, plus the GALIL's top quality materials and rugged simplicity, assures continued functioning under the most adverse conditions. The GALIL offers the ultimate refinement of the proven gas operation system with a unique variety of advanced features.

Both the .223 and .308 models have the GALIL's exclusive flip-up tritium night sight system and a thumb safety in addition to a traditional side lever safety. The sturdy folding stock provides compactness for easy transport, yet is completely rigid when extended. By design, the cocking handle, magazine release and safety system can be operated by either right or left-handed shooters with equal ease. The .223 GALIL offers additional flexibility with an optional AR-15/M-16 magazine adapter, permitting the use of this commonly available .223 magazine.

Most important, every GALIL is manufactured to the same demanding standards of performance and reliability as the world renowned UZI.

3. Thumb operated safety in addition to regular side safety lever.

The Deluxe GALIL Model ARM: a state-of-the-art battle proven rifle

For the first time, a civilian version of the Israel Defense Forces' primary battle rifle is now available in America.

This no-compromise rifle carries all the same design and performance features as the standard Model AR plus these deluxe additions: rugged, folding bipod with integral wire cutter; vented hardwood handguard and a carry handle. The Deluxe Model ARM also accepts all standard GALIL accessories.

.223 Model ARM.

In addition to warranty service facilities, Action Arms Ltd. offers a complete selection of authentic UZI and GALIL accessories. Each item listed here is designed and built to the same high quality standards as the guns themselves.

Ruger MKII

A wide variety of no gunsmithing mounts .

These rugged mounts are easy to install, rock-solid and are reasonably priced. None require gunsmithing and many provide low scope

mounting combined with a "see-thru" design that allows the use of open sights. Ask to see a model and compare.

NEW

New red dot Action Sights meet any target or hunting need.

THE MARK V: this is the first of the new generation of electronic sights offered by Action Arms Ltd. It is just 5-1/8 inches long and weighs only 5-1/4 ounces. With a 1 inch diameter tube, battery life of up to 500 hours and a 5 year warranty, the Mark V has revolutionized red dot electronic sights.

The New Pro 45° has all the same features as the Mark V plus it provides left or right side positioning of the battery pack at the shooter's option. The New Pro 45° is the most versatile, easy-to-mount electronic sight you can now choose.

The new ultra-compact, lightweight PRO V.

Also new for 1987, the Pro V is the smallest and lightest Action Sight ever offered. In either right or left handed models, the New Pro V offers master handgunners the small size and flexibility they need to exceed the toughest requirements of today's handgun competitions. Shooters recognize the Pro V as the best sight for modern handgun hunters and sportsmen.
