THE UZI® AMERICA™ STORY

*A powerful combination:
Mossberg's mil-spec manufacturing capabilities and Israel Military Industries' legendary small arms design.*

O.F. Mossberg & Sons, Inc. is proud to introduce UZI America. Destined to become one of America's pre-eminent law enforcement suppliers, this joint venture between O.F. Mossberg & Sons, Inc. and Israel Military Industries, Ltd. (IMI) brings together a unique

combination of design and manufacturing capabilities. UZI America will set a new standard of support for America's law enforcement professionals.

Already world renowned for their UZI submachine guns, carbines and Galil battle rifles, IMI is today's most innovative source for incredibly rugged and supremely reliable military and police firearms.

O.F. Mossberg & Sons, Inc. has taken the shotgun to new performance levels for law enforcement, with the only pump shotguns ever to consistently meet or exceed rigorous U.S. mil-spec and NIJ requirements.

And now, Mossberg proudly introduces the new M9200A1 - "Jungle Gun": the only autoloading shotgun to meet the same rigorous 3,000 round mil-spec torture test required for pump shotguns.

UZI America, Inc. - a wholly-owned subsidiary of O.F. Mossberg & Sons, Inc. - has created the ideal opportunity for advanced law enforcement technology development by drawing on the combined assets and advancements of both companies. In addition to marketing the law enforcement products of both IMI and Mossberg, UZI America provides an unparalleled parts and service support for America's law enforcement community.

● **NEW “FIRST RESPONDER™” UZI® POLICE CARBINE**

The Legendary Design: updated for today's law enforcement requirements.

The perfect companion to your issue handgun, this totally new semi-auto carbine is designed to extend the range and effectiveness of the 9mm and .40 service sidearm. The design is based on the renowned and thoroughly proven Mini UZI closed bolt system. The magazine well is

in the pistol grip for instinctive, “hand-to-hand” fumble-free reloading, even in complete darkness, and any UZI magazine will fit. A solid, fixed stock provides extra control and greater precision, yet the overall length is less than 30 inches with the 13 1/2 inch barrel and flash hider.

With a 16 1/4 inch barrel and no flash hider, this carbine gives the officer all the advantages of the closed-bolt “First Responder” Carbine without requiring Class 3 paperwork. The overall length is still less than 33 inches and the carbine accepts all UZI 20, 25 and 32 round magazines.

THE NEW UZI® “INDIVIDUAL OFFICER” CARBINE

AMERICA
UZI

● THE ORIGINAL UZI®

The Legendary Original

In the field of carbine and submachine gun design there is only one standard: the UZI. The world's elite police, security and military forces have relied on this remarkable weapon for over

40 years. Rugged and reliable, the UZI has stood up to the harshest environments and conditions and proven itself time after time. It is again available from UZI America. Select the original open bolt design or the latest closed bolt model.

**UZI stock,
Unfolded**

THE MICRO UZI® ●

Maximum firepower, Minimum size

Less than 11 inches long, the Micro UZI packs devastating firepower into the most compact and concealable package possible. Add legendary UZI reliability and you have the most effective close protection system ever made. The semi-auto UZI Pistol version of this remarkable weapon is also available and comes without the folding stock.

**Micro UZI stock,
Unfolded**

● THE MINI UZI®

Full-sized
firepower and
performance
in a more
compact design.

Four inches shorter
than the original,
the Mini UZI uses the same
magazines, fires the same
rounds and pumps out all of
the firepower of the full sized
model. This compact design

is becoming increasingly pop-
ular due to its firepower and
handier size. The Mini UZI
is available in both open- and
closed-bolt models.

Three-Position Selector

Suppressed Versions Available

AMERICA
UZI®

THE GALIL ARM

Today's most advanced version of a thoroughly battle-proven design.

Tritium Night Sights

Here are the design and proven gas system that defined the world's standard for the modern battle rifle. Its tubular steel stock folds for compactness, yet is rugged enough for door-breaking, entry situations. The exclusive flip-up, tritium night sight

system is standard on this and all Galils. In addition, this fully loaded model has a folding bipod with integral wire cutter, vented handguard, carry handle and ambidextrous controls. Specify semi-auto or selective fire configuration in either .223 or .308.

Galil ARM Bipod, Extended

When assault gun firepower is needed in close quarters situations, the Micro Galil is the answer. It carries a full 35 round magazine of .223 ammunition, yet is no larger than the standard UZI. In either semi-auto or selective fire versions, this ultra-compact Galil has all the quality and reliability that made the full-sized Galil famous.

THE MICRO GALIL

*Maximum firepower,
Minimum size*

Galil Stock, Unfolded

● THE GALIL SAR & AR

A more streamlined Galil in two barrel lengths and two calibers.

Ambidextrous selector on all models

Also featuring the flip-up tritium night sights, folding stock and ambidextrous controls, both the longer barreled AR or the shorter SAR can be specified in semi-auto or selective fire operating systems. These rifles have the military-

specified milled receiver and proven Galil gas system, but are made lighter and more streamlined by eliminating the bipod and carrying handle and adding a slimmer handguard. Both the full sized AR model and the compact SAR model are chambered for .223 and .308.

GALIL AR

GALIL SAR

Only a few of these unique .308 rifles are built each year. Individually hand assembled and tuned, they embody the extraordinary level of refinement and precision required to deliver exact shot placement in the most demanding tactical situations.

● THE GALIL SNIPER

● THE M590A1

Designed & built to meet mil-spec, Mossberg's newest pump shotgun is ideal for most law enforcement needs.

Nobody knows more about police and military shotguns than Mossberg and the new M590A1 is a perfect example. Here, in one shotgun, are all of the critical

Look at these "Law Enforcement Only" specs:

- Military Metal Trigger Housing
- Mil-Spec Heavy Wall Barrel
- Full Military Parkerized Finish

features that define the state of the art in modern fighting shotgun design. First and foremost, the M590A1 is built to meet the brutal mil-spec 3443E 3,000 round buckshot torture test. In addition, the M590A1 is designed to meet NIJ requirements.

- Ambidextrous Metal Safety
- Mossberg's Anti-Jam Elevator
- Easy-Cleaning, Straight-Thru Magazine Tube
- Full Range of Models, From 14" Barrel Compact to Full Length 9-Shot Model

There's an M590A1 built to fit every requirement, from tight entry situations to today's new down-sized vehicles

M590A1 6-Shot

M590A1 Compact

M590A1 Pistol Grip

THE NEW M9200A1 "JUNGLE GUN" AUTOLOADER

The first auto-loading shotgun developed expressly for the U.S. Military.

"The shotguns will be used in jungle, anti-narcotics maneuvers." –

Govt. Document DAAE-95-T-1255

Only Mossberg's mil-spec experience and advanced shotgun design abilities could create an autoloader capable of winning military contract DAAE20-96-P-0363.

Left-handed Folding Stock for Clean Ejection

To succeed, the new M9200A1 gas operated autoloader had to survive the same brutal 3,000 round mil-spec test used for pump shotguns. To assure this capability, Mossberg engineers simplified the gas system by designing a one piece piston with no loose seals or rings to fail. In addition, the system's recoil spring is mounted forward on the magazine tube to allow the use of a folding stock or pistol grip for maximum compactness and portability. Developed for the

U.S. military, this is the one autoloading shotgun proven to meet the most demanding mil-spec and law enforcement requirements. Just look at these "Law Enforcement Only" features:

- Hardcoat Anodized Receiver
- Military Metal Trigger Housing
- Mil-Spec Heavy Wall Barrel
- Full Military Parkerized Finish
- Ambidextrous Metal Safety
- Easy-Cleaning, Straight-Thru Magazine Tube

THE GHOST RING™ SIGHT

Mossberg pioneered this lightning-fast sighting system for law enforcement.

M590A1 GRS

Using the proven aperture rear sight with a broad and bright blade front sight, Mossberg's Ghost Ring Sight system delivers instant and precise

aiming, even in low light conditions. Whether you want the New M590A1 in full-sized or compact style, there is a quick pointing Ghost Ring Sight model available.

M590A1 GRS Compact

THE MARINER

THE MARINER™

In humid, or worse, salt air, Mossberg's exclusive Marinecote™ finish is the ultimate protection.

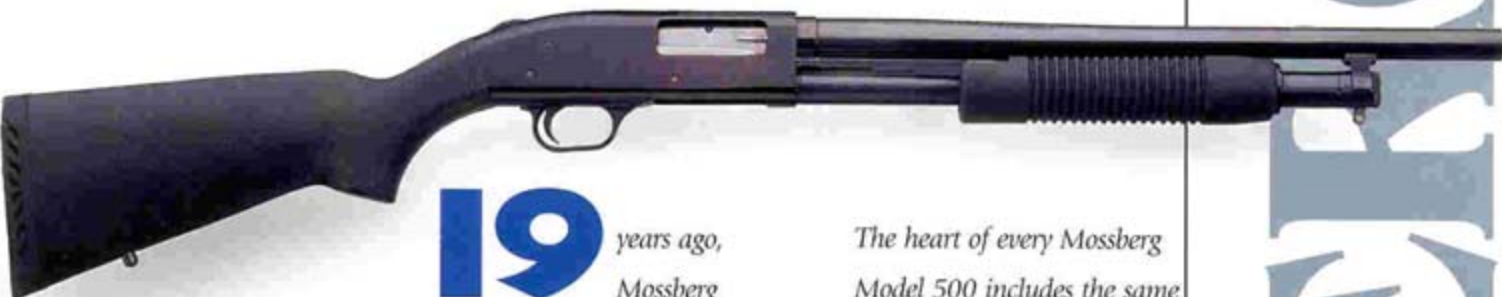

Developed to meet the most demanding atmospheric conditions, Mossberg's Marinecote finish has been tested and proven to outper-

form even stainless steel for corrosion resistance. When you need a shotgun for the worst conditions, M590 or Model 500, choose a Mariner™.

THE MODEL 500

*The original mil-spec pump shotgun,
still as tough and reliable as ever.*

19 years ago, Mossberg introduced the mil-spec pump shotgun to the law enforcement community. Today, the line has grown to include a wide array of models and features. Extended magazines, pistol grip models and corrosion fighting Mariner™ models: nobody delivers more options for law enforcement.

The heart of every Mossberg Model 500 includes the same basic design and ruggedness as our mil-spec shotguns and includes important features like these:

- Strong Dual Action Bars
- Anti-Jam Elevator
- Ambidextrous Safety
- Rugged Steel-to-Steel, Bolt Lockup

ER™ SERIES

THE MARINER™ LINE LAUNCHER

*Based on the proven M590 action, here's
the perfect line launcher for Police, Fire and Rescue.*

Packed in its own hard case, this launcher comes with both distance and floating heads and can dispense up to 650' of line upon firing.

Mossberg

THE UZI® EAGLE PISTOL LINE

*Superior quality,
polygonal rifling,
standard night sights;
in three sizes, three calibers
and two operating systems.*

Backed by both IMI quality and Mossberg service, UZI America's all new UZI Eagle line of pistols gives the shooter a range of choices. There are 3 sizes of all-steel models and a compact polymer frame model. All three sizes come in the traditional decocking double action and chambered for either 9mm or .40 S&W. A .45 ACP Short Slide model is also available.

In addition, a special compact "Double Action Only" model can be specified in 9mm and .40 S&W.

**TRITIUM
NIGHT SIGHTS
STANDARD ON
ALL MODELS**

Typically found only on more expensive guns, features like polygonal rifling and tritium night sights are standard on all UZI Eagle models. In addition, decocker models feature a decock lever that both moves and shields the firing pin during decocking.

Compare the quality, standard features and value.

You'll see that the UZI Eagle has the right combination for your needs.

SERVICE & SUPPORT

From simply supplying needed accessories to adapting a model to meet specialized departmental requirements, UZI America has the commitment and resources to deliver unequalled support. Equally important, UZI America offers full armorer support programs and

schools. Detail-stripping and maintenance instruction are combined with comprehensive trouble shooting to provide a complete course in keeping UZIs, Galils and Mossberg Shotguns operating in top condition. For more information about accessories or armorer training schedules, please contact UZI America.
